

SERIES KT 9 SINGLE STAGE HIGH PRESSURE REGULATOR HIGH RELIABILITY UNDER PRESSURE

- ◆ 6,000 psig inlet (414 bar) inlet to 2,500 psig (172 bar) outlet
- ◆ Stainless steel
- ◆ Self relieving and non-relieving*
- ◆ Piston sensing element
- ◆ High flow (HF) option
- ◆ Field repairable
- ◆ Welded face seal connection option**
- ◆ Knob LOTO option (refer to AP KL data sheet)
- ◆ Installation and operating instructions available at www.aptech-online.com in the Tech Briefs section

*Self relieving model vents pressure above set point to atmosphere automatically for ease of pressure adjustment and safety. Non-relieving model does not vent.

**This series is not assembled in a Class 100 cleanroom nor is it helium leak tested, though it is welded construction.

***HF option requires VS seat.

‡A pressure regulator Cv is a nominal value which indicates the point of choked flow. Please refer to a flow curve or a recommendation guide for usable flow range.
